DETAILED ACTION

Allowable Subject Matter

1. Claims 1-11 are allowed.
2. The following is an examiner's statement of reasons for allowance: A rheometer comprising a bearing block with no bore holes made from air permeable material, with a rotor having a shaft, and means for applying pressurized bearing air to a side of the bearing facing away from said shaft wherein bearing air penetrates through said bearing to form external cushion with a recess for supporting said shaft, in combination with all other limitations of the independent claim, is not disclosed nor deemed obvious in view of the prior art of record. The prior art does not teach a bearing without hole and made from air permeable material, that applies pressurized air in order to form an air cushion to support the bearing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The examiner has cited various references that are deemed relevant to the general state of the art of the present invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney T. Frank whose telephone number is (571) 272-2193. The examiner can normally be reached on M-F 9am -5:30p.m..
